Lab Assignment-12

PL/SQL TRIGGERS

1. Create a trigger for the CUSTOMERS table that automatically determines the values for the columns CREATED_BY, MODIFIED_BY, CREATED_DATE, and MODIFIED_DATE.

NOTE: You need to add the above-mentioned columns in the Customers table.

CUSTOMERS Table:

ID	NAME	AGE	ADDRESS	SALARY
1	Alive	24	Khammam	2000
2	Bob	27	Kadappa	3000
3	Catri	25	Guntur	4000
4	Dena	28	Hyderabad	5000
5	Eeshwar	27	Kurnool	6000
6	Farooq	28	Nellur	7000

Also, perform the below-mentioned queries:

- a. Modify the above trigger to automatically add the value of the Customer_id at the time of the INSERT statement.
- b. Create a row-level trigger for the CUSTOMERS table that would fire for INSERT/UPDATE/DELETE operations performed on the CUSTOMERS table. This trigger will display the salary difference between the old values and the new values.
- c. Create a trigger that does not allow INSERT/UPDATE/DELETE operations on the CUSTOMERS table on Saturday and Sunday.

- d. Modify the trigger that you have created in (c) to not allow any of the INSERT/UPDATE/DELETE operations on the CUSTOMERS table between 6 PM and 10 AM on the Weekdays.
2. Write a query to demonstrate the use of INSTEAD OF trigger on the TEACHERS and ROOMS table that you have created in assignment-10.
